

MOLDOVA'S CLOTHING, FOOTWEAR & ACCESSORIES MANUFACTURERS

A guide of trusted fashion
manufacturing, private label,
and ready-to-wear factories

MOLDOVA'S CLOTHING, FOOTWEAR & ACCESSORIES MANUFACTURERS

A guide of trusted fashion
manufacturing, private label,
and ready-to-wear factories

Foreword

An enabling economic vision for Moldova means establishing a knowledge-based economy to fully capitalize on our country's economic potential in the light of its competitive advantages. This implies investments in industries that could create products and services with high added-value and high appreciation of the invested capital.

One of the key priorities for the Moldova fashion manufacturing industry is to facilitate direct business between domestic manufacturers and foreign partners creating an effective and efficient value chain. This is the only way to keep the added value with the local producers, which will bring higher labour productivity, investments in R&D and new technologies.

I'm happy that the label "Made in Moldova" on the apparel, footwear and accessories has been crossing the country's border.

It has been a very good soar in this field, and we plan to develop policies to build on this momentum. Many of the entrepreneurs motivate us to promote better policies to support their ideas and confidence that one can build competitive business right here, at home.

In addition, Moldova has become a Member of the European Fashion Council, alongside Denmark, Norway, Austria, and Romania. This European-level status brings us merit-based recognition. Because the high quality of Moldovan products speaks of the standards and requirements met by the fashion industry manufacturers.

The Ministry of Economy and Infrastructure restates its commitment to support knowledge-based industry in Moldova as a key factor for Moldova's economic prosperity and sustainable growth.

Best regards,
**Ministry of Economy
and Infrastructure**

Dear partners,

During the past decade, Moldova's fashion manufacturing industry experienced big transformations, overcoming difficulties, adapting to changing global market and value chain, and most important – to the consumers' evolving expectations.

Thanks to the efforts of the Light Industry Employers Association (APIUS) and the support of our strategic partners – Moldovan Government, development agencies USAID, Sweden and UK Aid – we succeeded to grow Moldova's fashion manufacturing into a globally competitive industry, embracing productivity, automation, technologies, sustainability and innovation.

APIUS works to find ways for accelerating development of this industry. During 2018-2019 alone, our members did business in over

35 countries of the EU, CIS and other regions.

The DININIMA (From the Heart) national fashion identity launched by APIUS in 2012 underpinned an outstanding growth of new fashion brands, as well as industry turnover and exports. A benchmark of quality, DININIMA national brand was recognised as a success story internationally and is in line with the international "Go Green" strategy by promoting the concepts of "slow & sustainable fashion".

We are proud of Moldova's fashion manufacturers and brands, who create quality products aligned to international trends, at home, with love for people and for their work.

We wish you FROM THE HEART (DININIMA) health, cheer and welfare!

Best regards,
**APIUS Chairperson
Alexandra Can**

Key facts about the Republic of Moldova

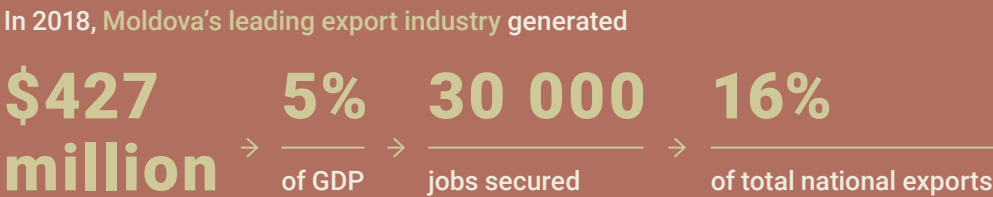

Population:	3.5 million
GDP per capita:	\$3,187
Inflation 2019:	6.5%
Employment rate:	46%
Corporate tax:	12%
Economy growth 2019:	4%
Rank in Doing Business (World Bank):	48 out of 190 countries
Official language:	Romanian
Other spoken languages:	Romanian, Russian, English, Italian, French, Spanish, Turkish, Bulgarian, Ukrainian, German
Exchange rate:	1 EUR - 19.5 MDL (October 2019)

Free trade agreements (FTA) signed with 43 countries:

- DCFTA
- FTA with CIS countries
- FTA with Turkey
- CEFTA Central European Free Trade Agreement

Located in the heart of Europe, Moldova's duty-free market can reach more than 880 million customers. With several free trade agreements in place, Moldova's agile labor force, fluid capital funding, and strong education makes it an attractive country for international business and investment.

General overview of Moldova's Clothing, Footwear & Accessories Sector

Over 95% of production is exported primarily to the UK, Romania, Italy, France, Germany, Belgium and other international markets

Average monthly salary

Key advantages are top quality production, short lead times, flexible orders, value-added manufacturing CMT and Full Package Service, including logistics, sourcing, design and pattern making

Over 100 local fashion brands have emerged, and are beginning to export to regional markets, such as Romania, Ukraine and Kazakhstan

ZIPhouse fashion excellence center was launched in 2015. Managed jointly by the Technical University and APIUS light industry association, it trains 1000+ professionals each year and accelerates fashion startups

DININIMA ("From the heart") umbrella fashion brand underpins design talent and domestic sales with an average yearly increase of 26%

Moldova’s clothing and footwear industry is a key sector of the Moldovan economy, built on its strong industrial past and longstanding manufacturing traditions dating back more than seven decades. The industry is worth USD \$427 million (2018), and has recorded continuous growth since 2000, contributing 5% to GDP in 2018.

Table 1: The value of sales from exports, by sector and by domestic purchases (2016-2018)

in USD Million	2016	2017	2018
Textile, Apparel, Footwear & Accessory Sales	360	402	427
Domestic Sales	56	65	70

Source: National Bureau of Statistics from Moldova

The industry is one of the largest exporters in the Moldovan economy, accounting for 16% of exports (2018) and recording 10% average export growth each year since 2015. The sector also accounts for 4% of the total national employment, with more than 30 000 people working across the industry, primarily women.

Clothing and footwear manufacturers have united under a shared goal of becoming more innovative, knowledge-intensive, value-added and sustainable, and are on track to transform the entire sector.

To date, of the 447 light industry enterprises in Moldova, over one fourth have shifted from low-to high-level sustainable manufacturing, creating value added, ensuring fair wages and enhancing long-term sectoral competitiveness, in comparison with 2005 when the ratio was 5% high value added to 95% low level manufacturing.

Moldova’s proximity to the EU is one of its key strategic advantages as a clothing supplier for consumer markets. Moldova is known for top quality production, short lead times, flexible orders, and value-added manufacturing from CMT plus to Full Package Service, including manufacturing, logistics, sourcing, design and pattern making. Underpinned by duty-free access to EU markets, Eastern European countries and Turkey, "Made in Moldova" fashion goods are exported to more than 12 countries, primarily the UK, Romania, Italy, France, Germany, Belgium, and the Netherlands.

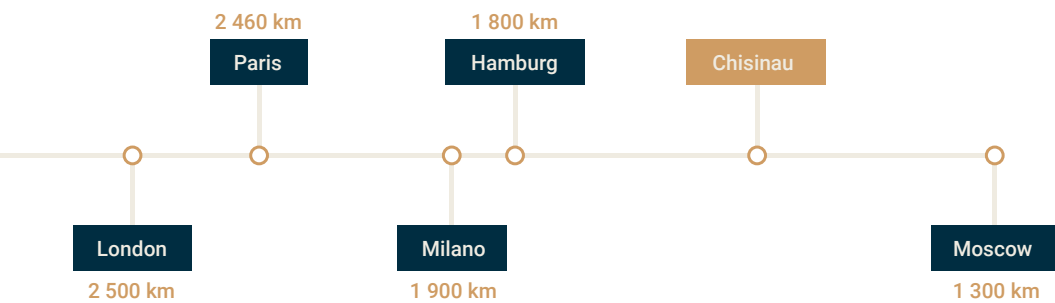

Due to the high quality of Moldovan manufacturing, local companies work with both upscale and massmarket foreign brands. Quality conscious brands ethically source a wide range of manufacturing services from Moldova. The majority of factories follow international quality management systems to ensure quality,

excellent industrial processes and occupational health & safety at every stage of production, including ISO, Business Social Compliance Initiative (BSCI), and Sedex Members Ethical Trade Audit (Sedex).

Ten key advantages to sourcing in Moldova

1. SHORT LEAD TIMES

Moldova’s central location facilitates an easy cooperation between the East and West, and major destinations in the EU and CIS can be reached from Moldova by truck within just two days. Orders are executed and delivered within an average of two to four weeks, with green corridor customs for most producers.

2. COMPETITIVE MANUFACTURING COST

Manufacturing costs are competitive in the region. These range from 0.07 EUR to 0.18 EUR per-minute, depending on the product complexity. Many factories are pursuing automation and digitization, optimizing production. The competitive labor force and lower production costs make Moldova an attractive nearshoring destination for high quality fashion products and services.

3. FLEXIBLE ORDERS

Sourcing in Moldova helps tackle two lead-times critical for extra agility: **Time-to-Market** and **Time-to-Serve**, which can both be addressed by Moldova’s flexibility of orders (**small quantity orders, no minimum order restrictions**).

4. HIGH RESPONSIVENESS TO MARKET DEMANDS

Moldovan factories use highly digitized and automated processes such as computer aided design (CAD) and computer aided manufacturing (CAM), enabling them to make fast product changes and raise the supply chain efficiency. Easily accessible logistics and services, combined with inwards delivery of raw materials and exports of finished products directly from Moldova facilitate simplified ordering and shipment processes, all in one place.

5. **STRONG MANUFACTURING AND DESIGN EDUCATION**

Moldova's fashion industry boasts a highly qualified labor force due to its strong education system. Seamstresses, designers and technicians are educated in specialized vocational schools and universities. ZIPhouse, The Center of Excellence and Acceleration in Design and Technologies plays a significant role as it drives innovation, promotes emerging designers, trains professionals on CAD, CAM and other automation technologies, market trends, design, business and marketing.

6. **MULTILINGUAL WORKFORCE**

The mélange of languages spoken by Moldovans provides a great advantage, with the ability to conduct business in Romanian, Russian, English, German, Italian, French and other international languages.

7. **LONG TRACK RECORD OF QUALITY CLOTHING PRODUCTION**

Most Moldovan apparel companies provide the full array of manufacturing services, from C&M and CMT to Full-Service Package and Private Label operations. Moldovan producers have a long track record of working with upscale European and international brands, such as **Moncler, Barbour, Max Mara, Gerry Weber, Luisa Spagnoli, Stefanel, Napapijri** and many more.

8. **INTERNATIONAL QUALITY MANAGEMENT SYSTEMS, AUTOMATION AND ETHICAL MANUFACTURING**

Another competitive advantage of using Moldovan manufacturers is widespread compliance with ISO 9001, ISO 45001 ensuring quality management systems, occupational health and safety of employees. These bring improved transparency to the value chain, reducing costs, errors and waste. Adherence to BSCI and SMETA Sedex draws Moldovan suppliers under one common Code of Conduct, protecting workers' rights and aligning with international social compliance standards, encompassing all aspects of responsible business practice. Moldovan factories are rapidly adopting new automation technologies in CAD/CAM, digital printing, sensors in production, etc.

9. **STRONG FASHION DESIGN**

Around 100 Moldovan designers represent the engine behind the revolution occurring in Moldova's fashion industry, bringing enhanced creativity to the sector combined with a desire to innovate, be sustainable, use ecofriendly fabrics, develop product concepts adapted to international trends. Their drive, passion and quality work put them on the international fashion scene, being present at the most preminent events.

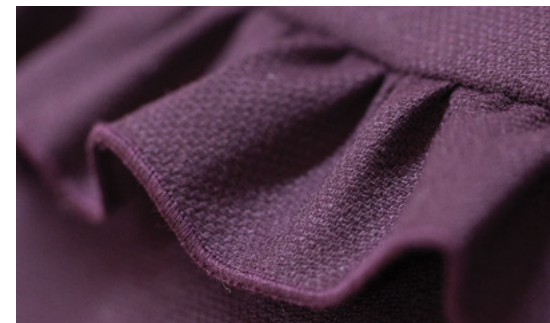

10. **AN INVESTMENT FRIENDLY ENVIRONMENT**

Moldova's policy agenda supports export-led economic growth. Its national development strategy focuses on improving the business-enabling environment, resulting in leaping few positions in World Bank (WB) [DoingBusiness2020](#) ranking to 48, surpassing even Italy, Hungary or Cyprus.

The WB "Cost of Doing Business" survey revealed that the number of days required to register a company decreased from 14 days in 2010 to 4 days in 2018, and the number of annual inspections per firm declined from 7.9 in 2010 to 2.3 in 2018.

Seven Free Economic Zones (FEZ) throughout Moldova provide excellent platforms that are convenient for export-oriented manufacturing companies, which benefit from preferential customs, taxes and fees.

The regular corporate tax rate in Moldova is 12% and the 20% VAT is reimbursed for exports. The IPR (Inward Processing) Customs Regime allows businesses to introduce, store, use and process raw materials on a temporary basis, suspending the duty and import VAT between the processes until the final product is fully exported. Underpinned by free trade agreements with the EU and CIS states, Moldova is able to release the EUR1 and CT1 certificate, enabling exporters to move goods across borders at reduced or no customs costs.

APIUS, The Moldovan Light Industry Association

APIUS The Moldovan Light Industry Association is the leading voice and the largest business association for Moldova's apparel, footwear and accessories sector. The association is committed to advancing the development of a thriving and sustainable fashion industry, bringing together more than **116 businesses** across the country, or 1/4 of Moldova's fashion manufacturers.

APIUS works to:

- ensure quality standards are met across the design and manufacturing sector;
- develop business capacities to help increase sales, efficiency and skills;
- advocate for pro-business legal environment;
- promote national fashion identity, DININIMA on the international and domestic markets.

DININIMA

From the heart/DININIMA has emerged as the primary identity for Moldova's fashion industry under one umbrella brand, revolutionizing how Moldovan-made fashion products are perceived by consumers around the world.

DININIMA aims to move to a higher income model of value-added products by increasing the competitiveness and prestige of Moldovan light industry enterprises, developing consumer oriented promotional programs, and improving consumer perception and knowledge of local brands:

- Consolidates 100 Moldovan fashion brands under DININIMA;
- Manages more than 3000 m2 joint retail space under DININIMA brand.

ZIPhouse, Center of Excellence and Acceleration in Design and Technologies

ZIPhouse is a fashion innovation platform that fosters forward-looking fashion skills, providing training for visual merchandising and branding, supply and production, engineering and technological skills with a focus on computer-aided design, pattern grading, process engineering and sustainable practices to increase innovation, efficiency and sales.

ZIPhouse connects local fashion designers to a global network of fashion experts and has become a national leader in the deployment of global fashion trends. Partnerships with top Fashion Universities, London College of Fashion, Polimoda, FTA Milano align Moldova with the newest trends, and bring new technologies and innovations in the sector.

ZIPhouse's programs focus on five strategic pillars:

- **Community Building** – more than 1,000 professionals benefit for collaboration, co-working, knowledge exchange.
- **Fashion Acceleration Program** – more than 34 emerging fashion designers have been accelerated with international mentorship.
- **Fashion Academy** – more than 90 local companies have been trained in forward looking skills through quality advanced technical training
- **Market Icebreaker** – discovering new fashion brands, designers and startups to facilitate market penetration.
50% of accelerated businesses export to EU countries.

The Moldovan Investment Agency

The Moldovan Investment Agency (MIA) is the central administrative authority subordinated to the Government of Moldova. The main role of the institution is to contribute to the economic development of the country, and a key activity is the promotion of the international image of the Republic of Moldova, with the purpose of attracting foreign investments, promoting exports and encouraging inbound tourism.

The agency provides tailored services for potential investors throughout the investment decision process, developing projects that create jobs and grow exports.

Areas of activity:

- Country brand promotion for **Investment** attraction, support & aftercare
- Supporting activities for **Export promotion**;
- Development & promotion of the **Tourism** sector.

The Moldovan Investment Agency supports the strategic sectors identified within the National Strategy for Investment Attraction and Export Promotion (Agrifood, Light Industry, Automotive and ICT & BPO) as well as specific niche sectors (ecological Agrifood, cosmetics, and furniture etc.).
