

## AVITA's Veterinary Vaccine list for Export

Row	Generic Name	Strength & Dosage form
1	PESTE DES PETITS RUMINANTS VACCINE (PPRV)	PPRV contain a live attenuated strain of Nigeria 75/1, Lyophilized powder with 100 Dose/Vial, (This product prevent PPR disease that imposes a significant constraint upon sheep and goats production owing to its high mortality rate. Moreover, the disease is endemic in many countries in the Middle East )
2	SHEEP POX VACCINE (SPPV)	SPPV contain a live attenuated strain of RM-65, Lyophilized powder with 50 Dose/Vial, (This product prevent SPP disease that is characterized disseminated cutaneous nodules and up to 100% mortality in fully susceptible breeds of sheep )
3	GOAT POX VACCINE (GTPV)	SPPV contain a live attenuated strain of Gorgan, Lyophilized powder with 50 Dose/Vial, (This product prevent GTP disease that is characterized disseminated cutaneous nodules and up to 100% mortality in fully susceptible breeds of goats )
4	CONTAGIOUS ECTHYMA VACCINE	Contagious ecthyma is a live attenuated strain of field, Lyophilized powder with 50 Dose/Vial, (This product prevent contagious ecthyma disease)
5	LUMPY SKIN DISEASE VACCINE (LSDV)	LSDV is a live attenuated strain of field, Lyophilized powder with 50 Dose/Vial, (This product prevent LSDV disease)

### Veterinary Vaccine Adjuvant For killed vaccines

<b>Vax-orient IPA-70</b>	Formulated with Mannide monooleate to induce a heightened and long-lasting antibody response. (New technology with high quality materials to improve your vaccine's efficacy)
<b>Vax-orient IPA-50</b>	Formulated with Mannide monooleate to induce a heightened and long-lasting antibody response. (New technology with high quality materials to improve your vaccine's efficacy)
