

**Θέμα:** Συμμετοχή σε δημόσια διαβούλευση για την ασφάλεια των παιχνιδιών ΕΩΣ 28 ΜΑΡΤΙΟΥ 2022

Αξιότιμοι-ες κύριοι-ες,

Στο πλαίσιο συγκέντρωσης πληροφοριών και απόψεων σχετικά με το πώς θα μπορούσε να βελτιωθεί η οδηγία 2009/48/ΕΚ για την ασφάλεια των παιχνιδιών, με στόχο την καλύτερη προστασία των παιδιών και την ενίσχυση της εποπτείας της αγοράς, σας γνωρίζουμε ότι βρίσκεται σε εξέλιξη δημόσια διαβούλευση στην οποία μπορούν να συμμετάσχουν όλοι οι ενδιαφερόμενοι (επιχειρήσεις, σύνδεσμοι, διοίκηση, πολίτες κ.α.) προκειμένου να συμβάλουν με τις θέσεις τους στην επίτευξη των ανωτέρω στόχων.

Σημειώνεται ότι η προηγούμενη αξιολόγηση της Ευρωπαϊκής Επιτροπής για σχετικά με την οδηγία για την ασφάλεια των παιχνιδιών ([https://ec.europa.eu/info/law/better-regulation/have-your-say/initiatives/1852-Evaluation-of-the-Toy-Safety-Directive\\_el](https://ec.europa.eu/info/law/better-regulation/have-your-say/initiatives/1852-Evaluation-of-the-Toy-Safety-Directive_el)) εντόπισε αρκετές ελλείψεις που θα μπορούσαν να θέσουν σε κίνδυνο την υγεία και την ασφάλεια των παιδιών, ιδίως όσον αφορά τις χημικές ουσίες. Η αξιολόγηση επισήμανε επίσης ότι η εποπτεία της αγοράς παραμένει ιδιαίτερα δύσκολη, ιδίως όσον αφορά τις διαδικτυακές πωλήσεις και διαπίστωσε ότι δεν ήταν πάντοτε ικανοποιητική η μεταφορά των τροποποιήσεων της οδηγίας για την ασφάλεια των παιχνιδιών στο εθνικό δίκαιο των κρατών μελών.

Παράλληλα, η στρατηγική για τη βιωσιμότητα των χημικών προϊόντων ([https://ec.europa.eu/knowledge4policy/publication/communication-com2020667-chemicals-strategy-sustainability-towards-toxic-free\\_en](https://ec.europa.eu/knowledge4policy/publication/communication-com2020667-chemicals-strategy-sustainability-towards-toxic-free_en)), η οποία περιγράφει τη στρατηγική της Ευρωπαϊκής Επιτροπής για την καλύτερη προστασία του κοινού και του περιβάλλοντος από επικίνδυνες χημικές ουσίες και την ενθάρρυνση της καινοτομίας για την ανάπτυξη ασφαλών και βιώσιμων εναλλακτικών λύσεων στο πλαίσιο της Πράσινης Συμφωνίας της ΕΕ ([https://ec.europa.eu/info/strategy/priorities-2019-2024/european-green-deal\\_el](https://ec.europa.eu/info/strategy/priorities-2019-2024/european-green-deal_el)), έχει δεσμευτεί να διασφαλίσει ότι η οδηγία για την ασφάλεια των παιχνιδιών θα παρέχει καλύτερη προστασία από τις πλέον επιβλαβείς χημικές ουσίες.

## Part I - Strengthening the protection of children against possible risks in toys

---

### 1. Strengthen the protection of children against chemical risks

The [evaluation](#) of the Toy Safety Directive identified several shortcomings – in particular concerning chemical risks – that could compromise the health and safety of children. In the EU, Regulation No 1272 /2008 on Classification, Labelling and Packaging (CLP) determines whether a substance or mixture displays properties that lead to it being classified as hazardous. The Toy Safety Directive generally bans in toys substances that are classified as carcinogenic, mutagenic or toxic for reproduction (CMRs) under the CLP Regulation, with only a few derogations. Substances under other hazardous classifications in the CLP Regulation are not currently covered by the general bans in the Directive. The chemicals strategy for sustainability commits to better protecting from the most harmful chemicals in toys and to extend the general bans to other most harmful chemicals, i.e. chemicals that affect the endocrine system, chemicals affecting the immune, neurological or respiratory systems, and chemicals toxic to a specific organ. The Directive already preventively bans carcinogenic, mutagenic or toxic-for-reproduction substances based on their hazardous properties and generic exposure and risk considerations. Limited exemptions to the general bans are allowed.

Chemicals with adverse effects on the environment, including endocrine disruptors and chemicals that are persistent, bioaccumulative and toxic, are regulated under REACH.

#### Question 1.

Do you agree or disagree that the EU rules on toy safety should set stricter requirements for chemicals in toys?

- ☐ Strongly agree
- ☐ Agree
- ☐ Neutral
- ☐ Disagree
- ☐ Strongly disagree
- ☐ No opinion

#### Question 2.

In your opinion, should the Toy Safety Directive address the following substances, and in what manner?

	They should be preventively banned from toys (generic risk assessment)	They should be banned only after they have been scientifically assessed and found unsafe for use in toys (specific risk assessment)	They should not be regulated in the Toy Safety Directive	I don't know /No opinion
Substances that are <b>known</b> or <b>presumed</b> to be disruptive to the endocrine system (endocrine disruptors for human health)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Substances that are <b>suspected</b> to be disruptive to the endocrine system (endocrine disruptors for human health)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Substances that affect the immune system	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Substances that affect the neurological system	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Substances that affect the respiratory system	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Substances toxic to a specific organ	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Substances that can cause an allergic response following skin contact (skin sensitizers)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Other substances – please clarify:

### Question 3.

Currently, the Directive allows for a number of derogations to the general bans on substances. In line with the chemicals strategy for sustainability, other most harmful chemicals – i.e. those that affect the endocrine system, those that affect the

immune, neurological or respiratory systems and those toxic to a specific organ – could also be subject to general bans.

**Do you agree or disagree that the Toy Safety Directive should, by way of exception, allow the presence of chemicals which are subject to current and new general bans?**

	Strongly agree	Agree	Neutral	Disagree	Strongly disagree	No opinion
When these chemicals are contained in equal or smaller concentrations than required to be classified as hazardous under the relevant EU legislation (CLP Regulation)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
When these chemicals are inaccessible to children in any form, including inhalation	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
When these chemicals are found to be safe for human health (as evaluated by a scientific committee) for that particular use in toys	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
When these chemicals are found to be safe for human health (as evaluated by a scientific committee) for that particular use in toys and there are no alternatives	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
When the use of these chemicals in toys is proven to be essential for society	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
There should be no derogations to the general bans	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Other – please specify:

#### Question 4.

How do you assess the likely overall impact of introducing general bans for the most harmful chemicals as described in the previous question, with some limited derogations if necessary?

Impact on:

	5	4	3	2	1	No opinion
Costs for companies to adapt to new chemical requirements	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

## Question 6.

The Directive currently only empowers the Commission to set limit values for additional chemicals in toys for children under 36 months and in toys intended to be put in the mouth.

**To what extent do you agree or disagree with the following statements?**

	Strongly agree	Agree	Neutral	Disagree	Strongly disagree	No opinion
The toy safety rules should continue to allow different requirements to be set for chemicals in toys for younger children (under 3 years) compared to older children	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

The toy safety rules should allow new requirements to be set for chemicals in any toy should new scientific knowledge emerge	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Other – please specify:

### Question 7.

The evaluation concluded that the current limits for (the carcinogenic) nitrosamines and their precursors, the nitrosatable substances, appear to be too high.

**Do you agree or disagree that limit values in the Directive for nitrosamines and nitrosatable substances should be lowered?**

- ☐ Strongly agree
- ☐ Agree
- ☐ Neutral
- ☐ Disagree
- ☐ Strongly disagree
- ☐ No opinion

### Question 8.

Do you think toys should be labelled with their chemical composition?

- ☐ Yes
- ☐ No
- ☐ No opinion

### Question 8b.

Which toys should be labelled with their chemical composition? (multiple replies possible)

- ☐ All toys
- ☐ Toys which are chemical mixtures and lead to intense exposure (such as modelling clay, slimes, soap bubbles, finger paints, water paints or toy pens)

- ☐ Toys containing specific allergenic fragrances, as is the case in the current Toy Safety Directive
- ☐ Toys intended for children under 36 months (as these children are more vulnerable or more likely to put toys in their mouth)
- ☐ Other – please specify

If you chose "Other - please specify", please specify here:

### Question 8c.

Which chemical substances in toys should be included on the label? (multiple replies possible)

- ☐ All chemical substances
- ☐ Allergenic fragrances
- ☐ Substances subject to general bans which may still be present in toys due to derogations
- ☐ Other – please specify

If you chose "Other - please specify", please specify here:

### Question 9.

How do you assess the likely overall impacts of requiring the labelling of chemical substances in toys?

Impact on:

*Scale from 5 (very positive), through 3 (neutral) to 1 (very negative)*

### Question 10.

Comments: (if appropriate)

## 2. Adapting the Directive to other risks

Digital technologies in toys may pose new risks for children, for example in terms of protection of data, privacy or risks linked to cybersecurity. The Directive is currently focused on the physical health and safety of children. Other pieces of horizontal EU legislation addressing aspects like cybersecurity and the protection of data or privacy in a more general manner (such as the Radio Equipment Directive, the General Data Protection Regulation or the proposed regulatory framework for artificial intelligence) also apply to toys.

### Question 11.

Do you agree or disagree that the Toy Safety rules should address the following, in addition to the EU legislation on these aspects referred to above? (multiple replies possible)

	Strongly agree	Agree	Neutral	Disagree	Strongly disagree	No opinion
Privacy breaches (for example, in relation to information or data on the child being shared)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Cybersecurity risks	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Psychological harm	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Other – please specify:

### Question 12.

What would be your preferred option to ensure that children are protected from new risks posed by the use of digital technologies?

- ☐ No action is needed
- ☐ Toys should comply with specific requirements for cybersecurity and privacy, additional to those for other connected consumer products
- ☐ Toys should comply with general requirements for cybersecurity and privacy for connected consumer products
- ☐ Toy safety rules should protect children from risks in toys not only for their physical health, but also for their mental health or cognitive development

Other – please clarify:

### Question 13.

How do you assess the likely overall impacts of your preferred option for adapting the Directive to risks posed by the use of digital technologies?

Impact on:

## Part II - Single market

The evaluation of the Directive found that many non-compliant toys are sold in the EU and that it is difficult to enforce the Directive, in particular for online sales. Enforcing the Toy Safety Directive in online sales is challenging: for instance because it is more difficult to reach online providers who place non-compliant products on the market, or to obtain the necessary documentation to assess the compliance of the toy with the Directive's requirements.

### Question 14.

To what extent do the following issues hamper the application of the Directive?

	To a very large extent	To a large extent	To a moderate extent	To a small extent	Not at all
The chemical requirements for toys are set out in different pieces of legislation	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The Directive and its regular adaptations to new scientific knowledge need to be transposed into national law	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Testing and safety/conformity assessment is done by the manufacturer itself without the intervention of a qualified conformity assessment body	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

### 1. Conformity assessment of toys

**Question 15.**

The Toy Safety Directive requires the manufacturer to demonstrate that the toy they produce conforms to the safety requirements applicable. Currently, third-party verification by a notified body is required only in very limited cases (i.e. when harmonised standards do not exist or are not applied, or when the manufacturer considers that the nature, design, construction or purpose of the toy necessitates third-party verification). A notified body is a test laboratory of recognised quality which has been designated by a Member State (where the test laboratory is located) for this purpose. The notified body then examines a prototype of the toy and delivers a certificate (EU-type certificate) on the conformity of the prototype with the requirements of the Directive.

**Do you think the toy safety rules should extend the obligation of third-party verification to more toys (EU-type examination)?**

- ☐ Yes
- ☐ No
- ☐ No opinion

**Question 15b.**

To which toys should the third-party verification apply?

- ☐ All toys
- ☐ Toys which are chemical mixtures and may lead to intense exposure to chemical substances (such as modelling clay, slimes, soap bubbles, finger paints, water paints or toy pens)
- ☐ Toys for children under 36 months (as these toys are subject to specific requirements, in particular the requirement not to contain small parts)

Other – please specify:

**Question 16.**

How do you assess the likely overall impacts of extending the requirements to apply third-party verification to other toys as in the previous question?

## 2. Obtaining compliance information and performing checks

In market surveillance, experience has shown that checks on toys can be difficult – mainly because key documents such as the EU declaration of conformity are difficult to obtain, are incorrect or of questionable quality, and/or are drafted only after a request from authorities. An option would be to require that products be accompanied by a digital product passport – including information on compliance of the product – which would ensure that information is immediately available to market surveillance and customs authorities.

### Question 17.

Should the following information be available through digital tools?

	Should be available in paper /on the product	Basic information should be available on the product /paper and more details can be available digitally	Should be available only digitally	No opinion

### Question 20.

While a Regulation is directly applicable in every Member State, a Directive has to be transposed by Member States into national legislation. The evaluation concluded that unequal transposition – as regards both substance and time – of the numerous amendments to the Directive into national law are a further obstacle to the single market.

**Do you agree or disagree that the Toy Safety Directive should be converted into a Regulation?**

- ☐ Strongly agree
- ☐ Agree
- ☐ Neutral
- ☐ Disagree
- ☐ Strongly disagree
- ☐ No opinion

Other – please specify:

### Question 21.

What would be your preferred measures to be included in the Directive to improve compliance and enforcement? (multiple replies possible)

- ☐ No action needed
- ☐ The toy should have digital information on compliance that should also be available at customs (digital product passport)
- ☐ More toys should be tested by a third party before they can be marketed in the EU
- ☐ The Directive should be converted into a Regulation

Other – please specify:
