

## Startups - BEYOND 2023

STARTUPS	PARTICIPANTS	DESCRIPTION
<p>1.CAMPSAROUND</p> 	<p>1.Kyriakos Tsigros 2.Katerina Kamtsi</p>	<p>Campsaround was the first online booking platform for nature stays in Greece and now has a presence in over 11 countries across Southern Europe, starting in 2020. Campsaround's mission is to assist visitors from all over the world in comparing, selecting, and booking online eco-friendly stays that respect local communities and the natural landscape, from the most basic to the most upscale and luxurious options.</p>
<p>2. IVOLUNTRY</p> 	<p>1.Andreas Kountouras, 2.Antypas Azoidis</p>	<p>The ivoluntry platform is a volunteer promotion network, enabling volunteers and organizations to maximize their social actions by matching them easily, directly and targeted. More specifically, the platform redefines the way in which volunteering is practiced to this day, taking advantage of the technological capabilities available in the modern era. It provides volunteers with the availability of all local and international activities based on their interests, records their contribution to them thus building their social CV, contributes to scientific research by completing questionnaires and also rewards their activity with virtual or real offers. It also has a modernized interaction system so that there is an additional incentive to participate. Finally, it offers autonomy and flexibility to the volunteering teams, giving it space on the platform for posting calls - actions, increasing the volunteer potential as well as the volunteer activity.</p>

<p><b>3. VIVESTIA</b></p> 	<p>1.George Kontaxis 2.Andreas Ginis</p>	<p>Vivestia, as a booking &amp; metasearch engine, is a marketplace that displays massive, luxury tourist accommodations utilizing the technology of 3D realistic tour (VR TOUR). As a platform, it aims to reduce the risk when choosing accommodation online by enabling the platform user to explore each accommodation in VR from the comfort of their personal device. In addition, it offers the possibility of direct booking. Vivestia presents luxury accommodations such as villas, 4 &amp; 5-star hotels, boutique hotels, while it intends to be the universal platform for displaying VR models in Europe, showing museums, weddings, etc.</p>
<p><b>4. QUETRI</b></p> 	<p>1.Kostas Kotsiopoulos, 2.Ilias Azaris</p>	<p>Q-GRC is a platform that will enhance governance by providing a holistic view of the organisation regarding internal audit, risk, compliance and ESG. Q-GRC is a platform that strengthens governance in organizations The Q-GRC platform utilizes modern technologies such as Artificial Intelligence, Machine Learning, Mobile apps, Cloud, etc. in order to offer to all stakeholders' accessibility from any device and the ability to monitor critical indicators as well as the ability to forecast specific KPIs, providing the ability for scenarios simulations. Q-GRC will be also a tool for consulting firms to offer their services digitally.</p>
<p><b>5. ATHLETON</b></p> 	<p>1.Effie Lounta 2.Apostolos Georgaroudakis</p>	<p>Athleton Plus is a social fitness marketplace that gets users motivated and gets studios and trainers new clients. It encourages users' engagement by allowing them to create communities and be social whilst keeping them focused with powerful training tools. It helps trainers and studios to advertise themselves to a wider audience. Our mission is to democratise training tools, collaborate with our partners and make fitness a social habit with measurable success.</p>
<p><b>6. UNLIMITED ADRENALINE</b></p> 	<p>1.Konstantinos Tzortzis 2.Ilias Mpasakiotis</p>	<p>Unlimited Adrenaline is the leading marketplace for Outdoor Activities and Adventure Trips in Greece with over 450 partnerships and 2000 experiences! We also provide tools to help our partners manage their businesses, and automate their processes, thus digitalizing the travel industry.</p>
<p><b>7. ELECTRIBE</b></p> 	<p>1.Nikos Chatzidakis 2.Antonia Farsati</p>	<p>ElecTribe offers Mobility As A Service for electric vehicles through platform, with flexible subscription plans and additional services for private and corporate customers.</p>
<p><b>8. INTELIGG P.C./SMARTH-PROP</b></p> 	<p>1.Christos Ioakimidis 2.Georgios Charitos</p>	<p>'c-BEMS is a unique cloud-based AI software-as-a-service (SaaS) tool for Building Energy Management Systems (BEMS) that supports multi-zonal control of heating/cooling and lighting systems for energy savings of 40% (4x more than any other globally) in any kind of building(s) with 25% less installation costs handled easily and controlled remotely while providing also a real-time CO2 emissions calculator for the building(s) serving the owners/managers/companies towards an easy application of their ESG objective.</p>

<p>9. DATAPHORIA</p> 	<p>1. Anastasios Stamatis 2. Fani Sourla</p>	<p>At Dataphoria, we are redefining sustainability transition with data. We provide an Analytics-as-a-Service platform for any company, organization, or city who wants to measure, optimize and communicate its sustainability transition. What sets us apart is the flexibility and scalability of our AaaS solution. We started in January 2021, and within a year we acquired clients in Greece and the UK, while in beta, and participated in 3 accelerator programmes, receiving grants and awards. Starting 2022, we are building strategic partnerships with an ESG-oriented startup in the UK and a Big 4 consultant in Greece, gaining access to clients and expertise as we move forward with the continuous development of our product.</p>
<p>10. PROJECT PARENTING</p> 	<p>1. Marina Arplia 2. Aggelina Mila</p>	<p>Project Parenting is the 1st Educational E-learning platform for parents in Greece, with educational content created by 130+ highly educated and experienced experts on parenting and self-development. Today's generation of parents is raising the next generation of human beings, children, and our goal is to support them to thrive on their difficult yet significant role.</p> <p>We are the 1st all-in-one subscription platform in Greece that has already provided to 2000+ parents since 2021 access to 450h on-demand videos, 500+ articles, 45+ e-books, 20+ live discussions where they ask their own questions and get answers. They have hundreds of topics to choose from regarding their child, their parenting, their own self-development &amp; relationships. Our educational content is based on the latest methods on parenting such as Positive Parenting, Attachment Parenting and more.</p>
<p>11. RHOÉ</p> 	<p>1. Aimilios Mouchtaropoulos 2. Domniki Meloudi</p>	<p>Rhoé is a mobility and green technology start-up that aims to lead the transition to cleaner forms of energy and create a more sustainable future for everyone, by making sustainable mobility solutions make business sense. For that purpose, Rhoé builds bleeding-edge optimization software that bridge the gap between carbon-neutral forms of energy with emergent technologies in mobility, enabling private and public organizations to attempt their green transition.</p>
<p>12. WELLBEE</p> 	<p>1. Dionysis Spiliopoulos 2. Nikolaos Starakis</p>	<p>Wellbee enables medical data sharing by ensuring transparency and accuracy of data.</p> <p>By connecting to Healthcare providers' servers, where medical data should be stored by law, we provide official owners of data the ability to access, view and share their medical records with third-party companies within seconds. Our solution helps insurance companies and doctors access clients' medical data inside a unified, simple, and secure environment with their client's approval. Insurance companies can now quickly request and access desired medical data to complete the underwriting and claims process for health insurance.</p> <p>This way we achieve operational and administrative efficiency for our b2b partners while providing our users with an online platform to have a holistic view of their medical records. Wellbee platform is 100% GDPR compatible and eliminates bureaucratic procedures in medical data sharing while enabling interoperability among healthcare providers.</p>

<p><b>13. KLEESTO</b></p> 	<p>1.George Pilpilidis 2.Manolis Adamopoulos 3.Christina Baroucha</p>	<p>Kleesto is the next-generation back-office system for travel companies helping them digitalize, automate, and optimize their business. We focus on operations management, saving up to 3,5 days' worth of time per week for our users. They can streamline their company's operations like distribution, communications, personnel and supplier's management, resources and equipment management, yield management, payments and expenses management, and advanced pricing management. Kleesto addresses OTAs, and resource-heavy tour operators (Private transfers, Boat charters, etc.), helping them grow their revenue.</p> <p>In the pandemic, the travel industry shifted its focus from just receiving bookings to how to manage these bookings efficiently. That was why kleesto developed its international presence organically during Covid in Europe, Central America, Africa, and Australia. That leads us to believe that now is the best moment to level up the game and increase our team, speed, and hence presence in the market.</p>
<p><b>14. QNT A.E.</b></p> 	<p>1.Dr. Aggelos I. Tsikas, Ph.D. 2.Mr. Aggelis L. Tsikas, M.Sc.</p>	<p>QNT provides the framework that automatically transforms high-level functional models into optimized quantum circuits for a wide range of back-end systems. Our goal is to allow algorithm designers to write high level functional models of their algorithms and have the software automatically compiled to an optimized quantum gate-level implementation. The software we develop increases the level of abstraction and permits developers to implement programs without the need to design the specific gate-level quantum circuits, enabling programmers to accelerate the development of algorithms without the need and expense of manually coding every step and function. Our technology primarily includes original R&amp;D in quantum circuit optimization, the deployment of one of the very few working quantum compilers globally, and break-through developments in neural network flows. As industry-agnostic, our technology is readily applicable to, and in great demand from, major industrial sectors, primarily pharmaceutical, defense, chemical, financial, cyber-security and automotive conglomerates and climate change modelling institutions.</p>
<p><b>15. VOCA ACADEMY</b></p> 	<p>1.Elitsa kostova 2.Boyan Kelchev</p>	<p>Voca Academy helps IT BPO companies create a culture of engagement and productivity and thus increase their profit and productivity from employees while those are happy at work. We do that with our innovative training curriculum and gamification with crypto token."</p>
<p><b>16. IREROBOT</b></p> 	<p>Panagiotis Xydias</p>	<p>IREROBOT's proprietary technology, protocol, and algorithms are the foundations for developing, designing, and building a wide spectrum of interfaces, wearables, and other devices that enable sensory-enhanced experiences. Currently, our flagship project is ACETT, which stands for auditory communication enhancement through touch, and is set to revolutionize the tactile interface industry by enabling natural immersion in the acoustic world through the sense of touch.</p>

<p><b>17. ManaGi</b></p> 	<p>1. Grigorios Koutsouflianos 2. Panagiotis Hatzilazaridis</p>	<p>ManaGi is the first Outsourced-Exports Department for companies of Greek F&amp;B and Natural Cosmetics industry. ManaGi's vision is to bridge the gap between Greek F&amp;B Products and the Global markets.</p>
<p><b>18. Oxygen Broadband</b></p> 	<p>Nikos Kopsias</p>	<p>Oxygen Broadband is one of the leading Product &amp; Solution Providers for the new emerging and converging technologies of telecommunications for Greece, Balkans and Central Eastern Europe. The core strengths of Oxygen Broadband are its highly skilled professional experts and its strategic alliances with leading technology partners. Committed to design innovative products and services by using the latest technology trends, the company builds upon the expertise of its R&amp;D engineers in the areas of Embedded Linux OS, IP Stacks, VoIP Protocols, DSP Compression Algorithms, Device Provision and Management and Organization of Large Scale Production. Solid Research and Development into the areas of QoS Support and Performance/Session, User and Device Mobility/Network Security and Privacy, provides our customers with new and innovative products.</p>
<p><b>19. SafeSize</b></p> 	<p>Aggelos Stavrakis</p>	<p>SafeSize helps millions of people find the perfect fitting shoes in physical and online stores using 3D scanning technology powered by a self-learning recommendation algorithm. In-store solution: ScanMate 3D Analyze the 3D foot anatomy and walking or running patterns of customers to provide the most accurate shoe and insole recommendation. Online solution: FitMate 3D A product suite of online tools that enable your customers to access their personal profile and purchase the most comfortable shoes online. Anytime, anywhere.</p>
<p><b>20. DISTEMICHA</b></p> 	<p>Dimitris Michalagas</p>	<p>Informatics - programming and deep data analysis with an ardent interest in the development of sophisticated applications, state of the art corporate websites as well as profitable e-commerce solutions.</p>
